ABOUT ME

Full-Stack Software Engineer with 5+ years building scalable, AI-powered products used by millions. Specialized in multi-LLM and multi-agent architectures (OpenAI, OpenRouter, Groq) across TypeScript, Node.js (NestJS, Fastify), React/Next.js, Vue 3, Python/FastAPI, PostgreSQL, Redis, and AWS/Docker, optimizing for outcomes over output from problem definition through delivery.

EXPERIENCE

Software Engineer II *United States (Remote)*
Dex *2025 - Present*

- Architected and shipped a multi-agent AI Copilot: a Coordinator Agent routing user intent across 40+ tools via the OpenAI Agents SDK, with token-by-token SSE streaming to a Vue 3 / Fastify / PostgreSQL stack.
- Designed a multi-LLM integration layer (OpenAI, OpenRouter, Groq) with automatic provider fallback that kept AI features online through a complete Groq outage, with zero user-facing downtime.
- Led a 43-issue system audit that resolved latency and reliability bottlenecks, including a hard-to-reproduce AbortController race condition affecting streaming responses.
- Delivered full-stack CRM features across web and mobile (Vue 3, Node.js, Prisma, PostgreSQL, React Native / Expo), shipping to the App Store and Google Play.

Software Engineer II *United States (Remote)*
Mint Mobile *2024 - 2025*

- Developed and maintained high-traffic e-commerce services supporting 2-3M mobile subscribers, building REST APIs with PHP, TSOA, and WordPress.
- Built custom WordPress plugins that let marketing teams update landing pages without engineering involvement, removing a recurring developer bottleneck.
- Maintained a shared React/Next.js component library used across internal and customer-facing apps, improving UI consistency and developer velocity.

Software Engineer I *Argentina*
Pollux *2022 - 2024*

- Built and shipped full-stack features for multiple client products (PHP/Laravel, Next.js, AWS, Docker), working with stakeholders from requirements to production.
- Conducted code reviews and mentored junior engineers, improving code quality and accelerating onboarding.

SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL
Frontend: React, Next.js, Vue 3, React Native, Expo (EAS), GraphQL, Server-Sent Events (SSE)
Backend: Node.js, NestJS, Fastify, Express, FastAPI, REST, Microservices
AI & Data: OpenAI, OpenRouter, Groq, PostgreSQL, Redis, MongoDB
Cloud & DevOps: AWS (ECS, Lambda, SQS, SNS, SES), Docker, CI/CD

EDUCATION

Universidad Tecnológica Nacional — Rosario, Argentina, *2019 - 2024*
Information Systems Engineering

ACTIVITIES

ICPC South America Regional Finals (2024) — Qualified, *Universidad Tecnológica Nacional (UTN)* *2023*
GTS Algorithmic Trading Competition — Winner, *GTS* *2023*
